FABRICS AND MATERIALS

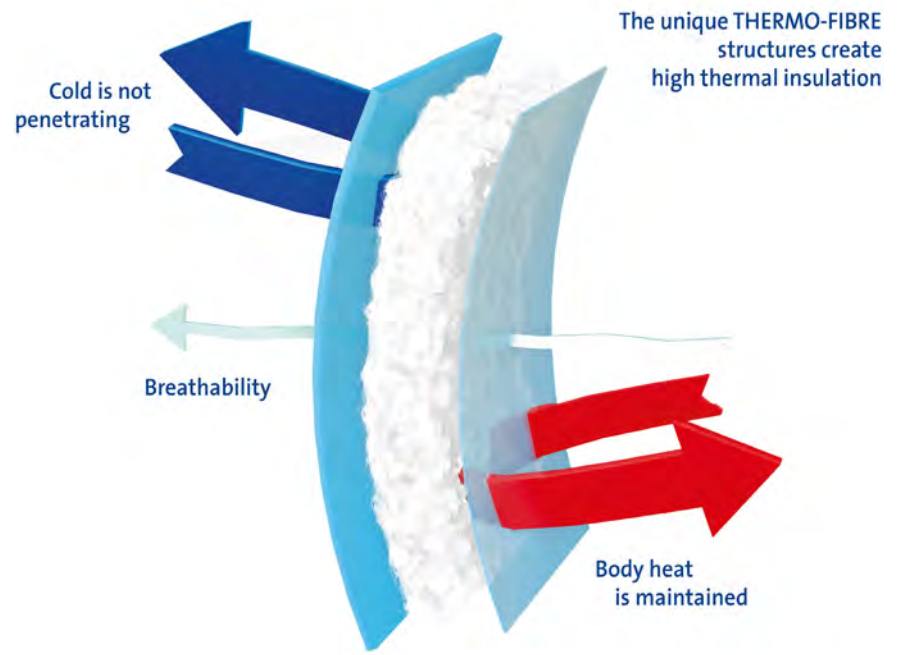

comfortemp®

Comfortemp® is a range of advanced technology materials, combining comfort with high thermal insulation properties.

COMFORTEMP®
OS156
150 g/sqm
100% Polyester

Comfortemp®: Synthetic insulation (150 g/sqm) with soft touch, high insulation properties. A warm and durable insulation that offers greater freedom of movement with an exclusive fiber migration treatment. Easy care. This first ever padding made from fiberballs combines the advantages of loose down fillings and padding in a quality that has not previously been achieved. This thermal insulation is higher than conventional padding while being as light and soft as down: an innovative alternative to down, with optimal breathability. Uniform structure even after washing, ensuring no cold spots.

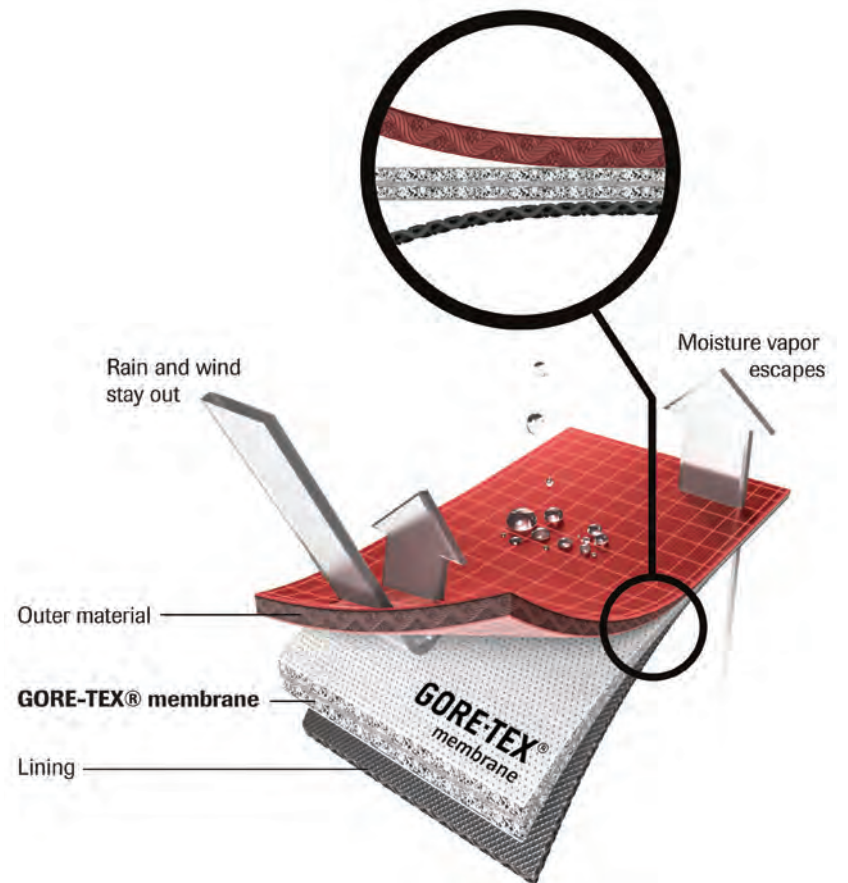

Garments made with **GORE-TEX®** fabric are durably waterproof, windproof and highly breathable. These garments provide reliable weather protection and maximum comfort for a wide range of activities.

**GORE-TEX® PRO
TS454**
118 g/sqm
100% Nylon 6.6 High Tenacity face
and 100% Nylon 6 back

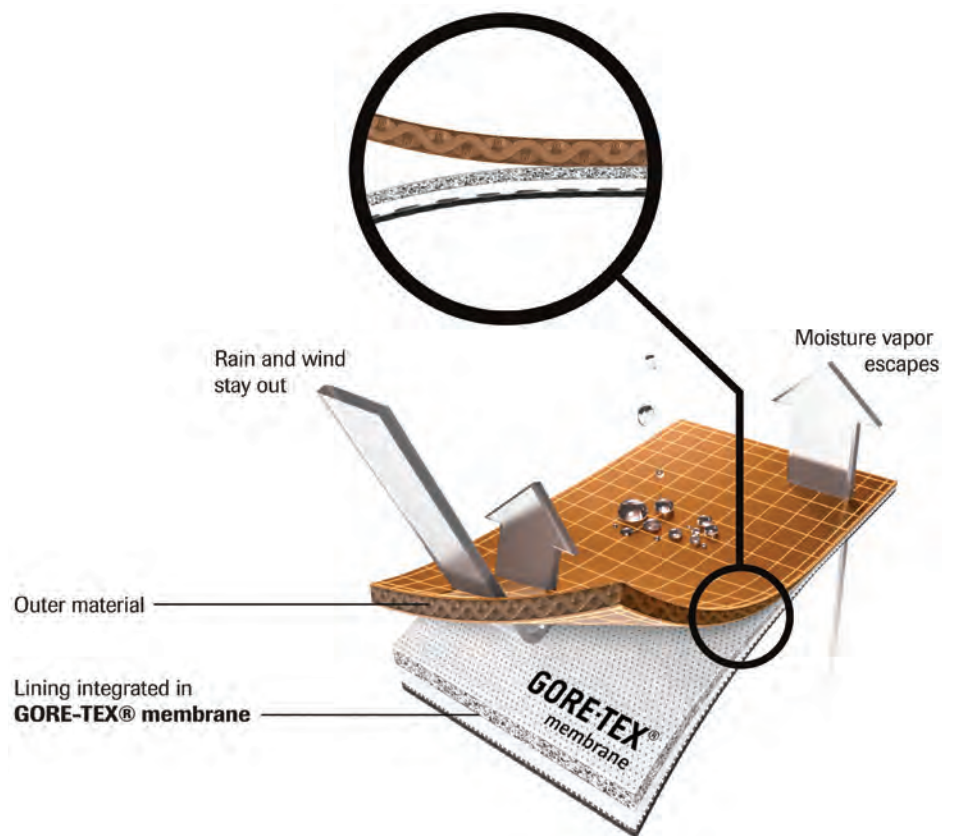

3-layer GORE-TEX PRO fabric in polyamide 6.6 (118 g/sqm). Traditional nylon ripstop, light weight with a dull matt optic. Excellent waterproof (28,000 mm water column), breathable (RET < 6) and water-repellent properties, dries quickly and is easy to clean. Offers excellent abrasion resistance and is guaranteed to be permanently waterproof. ANTIUV: UPF50+.

**GORE-TEX® ACTIVE
TS442**
96 g/sqm
100% Nylon 6.6 High Tenacity

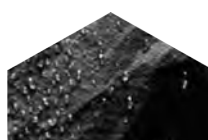

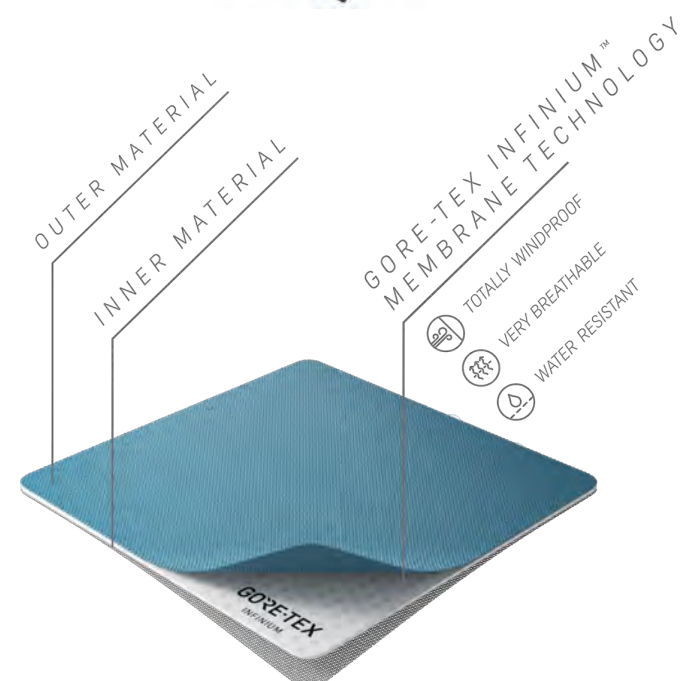

3-layer polyamide fabric (96 g/sqm) with plain construction. Lightweight, soft, quiet and extremely breathable; laminated with a special Nylon 6.6 circular knit, integrated in membrane. Excellent waterproof (28,000 mm water column), breathable (RET < 3,5) and water-repellent properties, dries quickly and is easy to clean. Offers excellent abrasion resistance and is guaranteed to be permanently waterproof. ANTIUV: UPF50+.

**GORE-TEX INFINIUM™
TS480**
218 g/sqm
47% Nylon 45% Polyester 8% Elastane

3-layer, 4-way stretch Polyamide fabric, with Double Ripstop construction, bonded with soft, warm microfleece compatible with the stretch properties of the fabric on the outside. The DWR water-repellent finish protects the fabric from inclement weather, while the special breathable membrane is windproof.

pro·meteo

WATERPROOF

The fabrics with **PRO-METEO** technology are multifunctional materials able to provide long-lasting protection from the weather, waterproofness, windproof properties and high breathability. Designed to ensure long life, they guarantee lightness, ideal comfort and high protection against atmospheric agents.

PRO-METEO 3 LAYERS

TS520

170 g/sqm

100% Polyester face and 100% Nylon back

pro·meteo

3 LAYERS

3-layer natural stretch fabric (170 g/sqm) in Polyester on the outside. Bonded to a particular light knit in Nylon by laminating with a waterproof (20.000 mm water column), highly breathable (15.000 g/sqm/24h), windproof polyurethane membrane. Guarantees excellent mechanical resistance. The DWR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes. ANTIUV: UPF50+

2 LAYERS

CORDURA

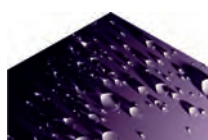

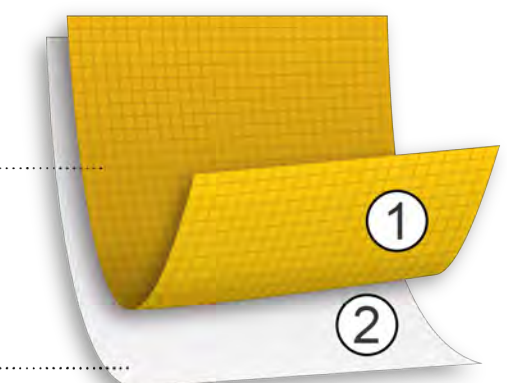

CORDURA® Nylon fabric (79 g/sqm) with double ripstop construction and water-repellent treatment. Very light and compact provides excellent mechanical resistance. A special polyurethane coating on backside gives waterproofness (7000 mm water column), high breathability (7000 g/sqm/24h), and windproofness. The fabric does not absorb water and dries quickly, even after numerous washes. CORDURA® products are composed by 100% Polyamide 6.6 High Tenacity textured high technology. Developed for maximum strength and durability, lightness and easy care. Even lightest Cordura® fabric offers a resistance to abrasion twice higher than a normal air texturized nylon fabric. ANTIUV: UPF50+.

FUNCTIONAL FABRICS

**HIGH VISIBILITY
TS864
130 g/sqm
100% Polyester**

Special Knit (130 g/sqm), compact construction, made in 100% Polyester for High-Visibility garment, with EN ISO 20471 certification. Very high durability and maximum breathability, quick-dry properties and easy care.

**HIGH VISIBILITY WATERPOOF
TS865
200 g/sqm
100% Polyester**

High Visibility 2-layer fabric (200 g/sqm) in Polyester on the outside, certified under Std Norm EN ISO 20471. Bonded by laminating with a special waterproof (> 13000 mm water column), highly breathable (RET >20, 10000 g/mq/24h), windproof polyurethane membrane. Guarantees excellent mechanical resistance. The WR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes.

**POLARTEC® POWER GRID™
PS486
230 g/sqm
93% Polyester 7% Elastane**

Fabric with patented bi-component grid construction, highly breathable and able to diffuse next-to-skin moisture vapour for first-class moisture management. Easy-care, quick-drying fabric. With SUN-PROTECTION technology to keep out at least 93% of UV rays (UPF15+) - in accordance with AATCC 183, ASTM D6063) standard. Polygiene® odor control permanently protects this fabric from smelling. Sweat itself is odorless, but it creates the conditions that bacteria need to multiply, and some of those bacteria produce odors. Polygiene permanent odor control stops the growth of odor-causing bacteria on fabrics, so you can wear more and wash less.

**NO WIND STRETCH
TS318
292 g/sqm
86% Nylon 14% Elastane**

4-way stretch wind-resistant softshell fabric (292 g/sqm), with double Ripstop Nylon on the outside for excellent mechanical performances. Special 3D grid knit on backside with "waffle" construction for breathability and quickdry properties. The DWR water-repellent coating offers protection from external moisture and rain. ANTIUV: UPF50+.

**BI-STRETCH PFC FREE
TS368
235 g/sqm
50% Nylon 42% Polyester 8% Elastane**

4-way stretch Polyamide fabric (235 g/sqm) with PFC FREE water-repellent treatment. Excellent tear and abrasion resistance. Extremely comfortable next to the skin thanks to the double weave construction, slightly brushed on the back. PFC FREE DWR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes. The special water-repellent finishing ensures the absence of fluorinated compounds, harmful to the environment. ANTIUV: UPF50+.

**DOUBLE WEAVE 4 WAY
TS326
245 g/sqm
95% Nylon 5% Elastane**

4-way stretch Polyamide fabric (245 g/sqm). Excellent tear and abrasion resistance. The double weave construction with inside in relief keeps the fabric away from the skin, thus enhancing comfort and breathability. The DWR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes. ANTIUV: UPF 50+.

**BI-STRETCH AIR+
TS312
190 g/sqm
91% Nylon 9% Elastane**

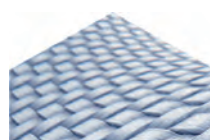

Durable Water Repellent 4-way stretch Polyamide fabric (190 g/sqm). Excellent tear and abrasion resistance. The double weave construction with inside in relief keeps the fabric away from the skin, thus enhancing comfort and breathability. The DWR (durable water repellent) finish guarantees lasting performance, even after numerous washes. ANTIUV: UPF50+.

**BI-STRETCH DWR
TS358
183 g/sqm
89% Nylon 11% Elastane**

4-way stretch Polyamide fabric (183 g/sqm). Excellent tear and abrasion resistance. The double weave construction with inside in relief keeps the fabric away from the skin, thus enhancing comfort and breathability and offer good wind-protection. The DWR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes. ANTIUV: UPF50+.

FUNCTIONAL FABRICS

STRETCH LIGHT
TS285
168 g/sqm
53% Polyester 47% Nylon

STRETCH
LIGHT

Weft-stretch polyamide fabric (168 g/sqm) with water-repellent coating. Very light and compact, pleasant and cool to the touch, with excellent mechanical resistance. The fabric does not absorb water and dries quickly, even after numerous washes. ANTIUV: UPF50+.

RIP-STOP BI-STRETCH DWR
TS170
155 g/sqm
86% Nylon 6 14% Elastane

RIP-STOP
BI»STRETCH
DWR

Lightweight 4-way stretch Polyamide fabric (155 g/sqm), with Ripstop construction, for excellent tear and abrasion resistance. Excellent breathability, resistance and comfort are the hallmarks of this material, with DWR water-repellent finish for lasting performance, protecting the product from external moisture and rain.

MICRO DOUBLE WEAVE
TS540
145 g/sqm
87% Nylon 13% Elastane

pf
free
MICRO
DOUBLE
WEAVE

4way stretch Nylon lightweight fabric (145 g/sqm). Good tear and abrasion resistance. The double weave construction with inside in relief keeps the fabric away from the skin, thus enhancing comfort and breathability. PFC FREE DWR water-repellent coating offers protection from external moisture and rain: the fabric does not absorb water and dries quickly, even after numerous washes. The special water-repellent finishing ensures the absence of fluorinated compounds, harmful to the environment. ANTIUV: UPF50+.

BI-STRETCH LIGHT
TS286
137 g/sqm
86% Nylon 6 14% Elastane

BI»STRETCH
LIGHT

4-way stretch Polyamide fabric (137 g/sqm), with excellent abrasion resistance and DWR water-repellent coating. Very light (137 g/sqm) and compact, pleasant and cool to the touch, with high mechanical resistance. The fabric does not absorb water and dries quickly, even after numerous washes. ANTIUV: UPF50+.

MICRO RIP-STOP WP 500mm
TS153
37 g/sqm
100% Nylon

MICRO
RIP-STOP
WP 500 mm

Super-light Downproof, windproof Polyamide fabric (37 g/sqm) with micro-ripstop construction, excellent mechanical performance and tear and abrasion resistance. Very soft and comfortable to the touch, the outside of the fabric has a water-repellent finish, while the inside has an extra-light, breathable polyurethane coating to protect it from the rain (water column 500 mm). ANTIUV: UPF50+.

MINI RIP-STOP DWR
TS114
39 g/sqm
100% Nylon

MINI
RIP-STOP
DWR

Super-light Downproof, windproof Nylon fabric (39 g/sqm) with mini Ripstop construction. Excellent abrasion resistance and protection from external humidity and rain: the fabric does not get wet and dries quickly, thanks to the particular DWR water-repellent finish, which guarantees lasting performance, even after numerous washes. ANTIUV: UPF50+

KEVLAR STRONG
TS101
240 g/sqm
70% Nylon 25% Aramid 5% Elastane

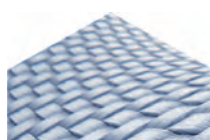

Kevlar
STRONG

4-way stretch fabric (240 g/sqm) with Ripstop construction and water-repellent finish for quick drying, maximum breathability and lasting performance. Made of Polyamide stretched with Lycra® and Kevlar® to boost mechanical resistance. Extremely comfortable and abrasion resistant, for excellent tear resistance. ANTIUV: UPF50+.

RIP-STOP STRONG
TS073
185 g/sqm
73% Nylon 14% Polyester 13% Elastane

RIP-STOP
STRONG

4-way stretch fabric (185 g/sqm) with Ripstop construction and water-repellent finish for quick drying and maximum breathability. Extremely comfortable and abrasion resistant, woven for excellent tear resistance. ANTIUV: UPF50+.

FUNCTIONAL FABRICS

THERMOLITE®
PS084
270 g/sqm
48% Nylon 40% Polyester 12% Elastane

THERMOLITE®

Comfortable, all-way stretch, high-performance fabric (270 g/sqm) with water-repellent finish. Brushed on the inside for comfortable warmth and good insulation, heat regulation by Polyester Thermolite® hollow-core yarns. High breathability and excellent pilling resistance. ANTIUV: UPF50+

SUPER THERMAL STRETCH DWR
PS085
260 g/sqm
86% Nylon 14% Elastane

**SUPER
THERMAL
STRETCH DWR**

Comfortable, all-way stretch, high-performance fabric (260 g/sqm) with water-repellent finish. Brushed on the inside for comfortable warmth, moisture control and good insulation. High breathability and excellent pilling resistance. ANTIUV: UPF50+.

THERMAL QUICK DRY
PS300
220 g/sqm
90% Polyester 10% Elastane

**THERMAL
QUICK DRY**

Dual stretch thermal fleece (220 g/sqm), with special anti-pilling treatment, excellent abrasion resistance and quickdry properties. The special construction makes the fabric comfortable and resistant, while the micro-grid structure on the back wicks sweat away from the skin where it can evaporate quickly. ANTIUV: UPF20+

THERMAL STRETCH GRID
PS210
205 g/sqm
95% Polyester 5% Elastane

**THERMAL
STRETCH GRID**

4 way stretch technical knit (205 g/sqm) in Polyester and Elastane designed to keep you dry and comfortable with special brushed "grid" frame on backside. Highly breathable. "Touch points" on the fabric inner surface draw off the sweat to the outside of the fabric for quickdry properties, for maximum moisture control. With ANTI-UV protection to keep out at least 93% of UV rays (UPF15+) - in accordance with AATCC 183, ASTM D6063) standard.

TREVIRA BIOACTIVE JERSEY
JS156
160 g/sqm
100% Polyester

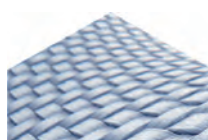

**trevira
BIOACTIVE**

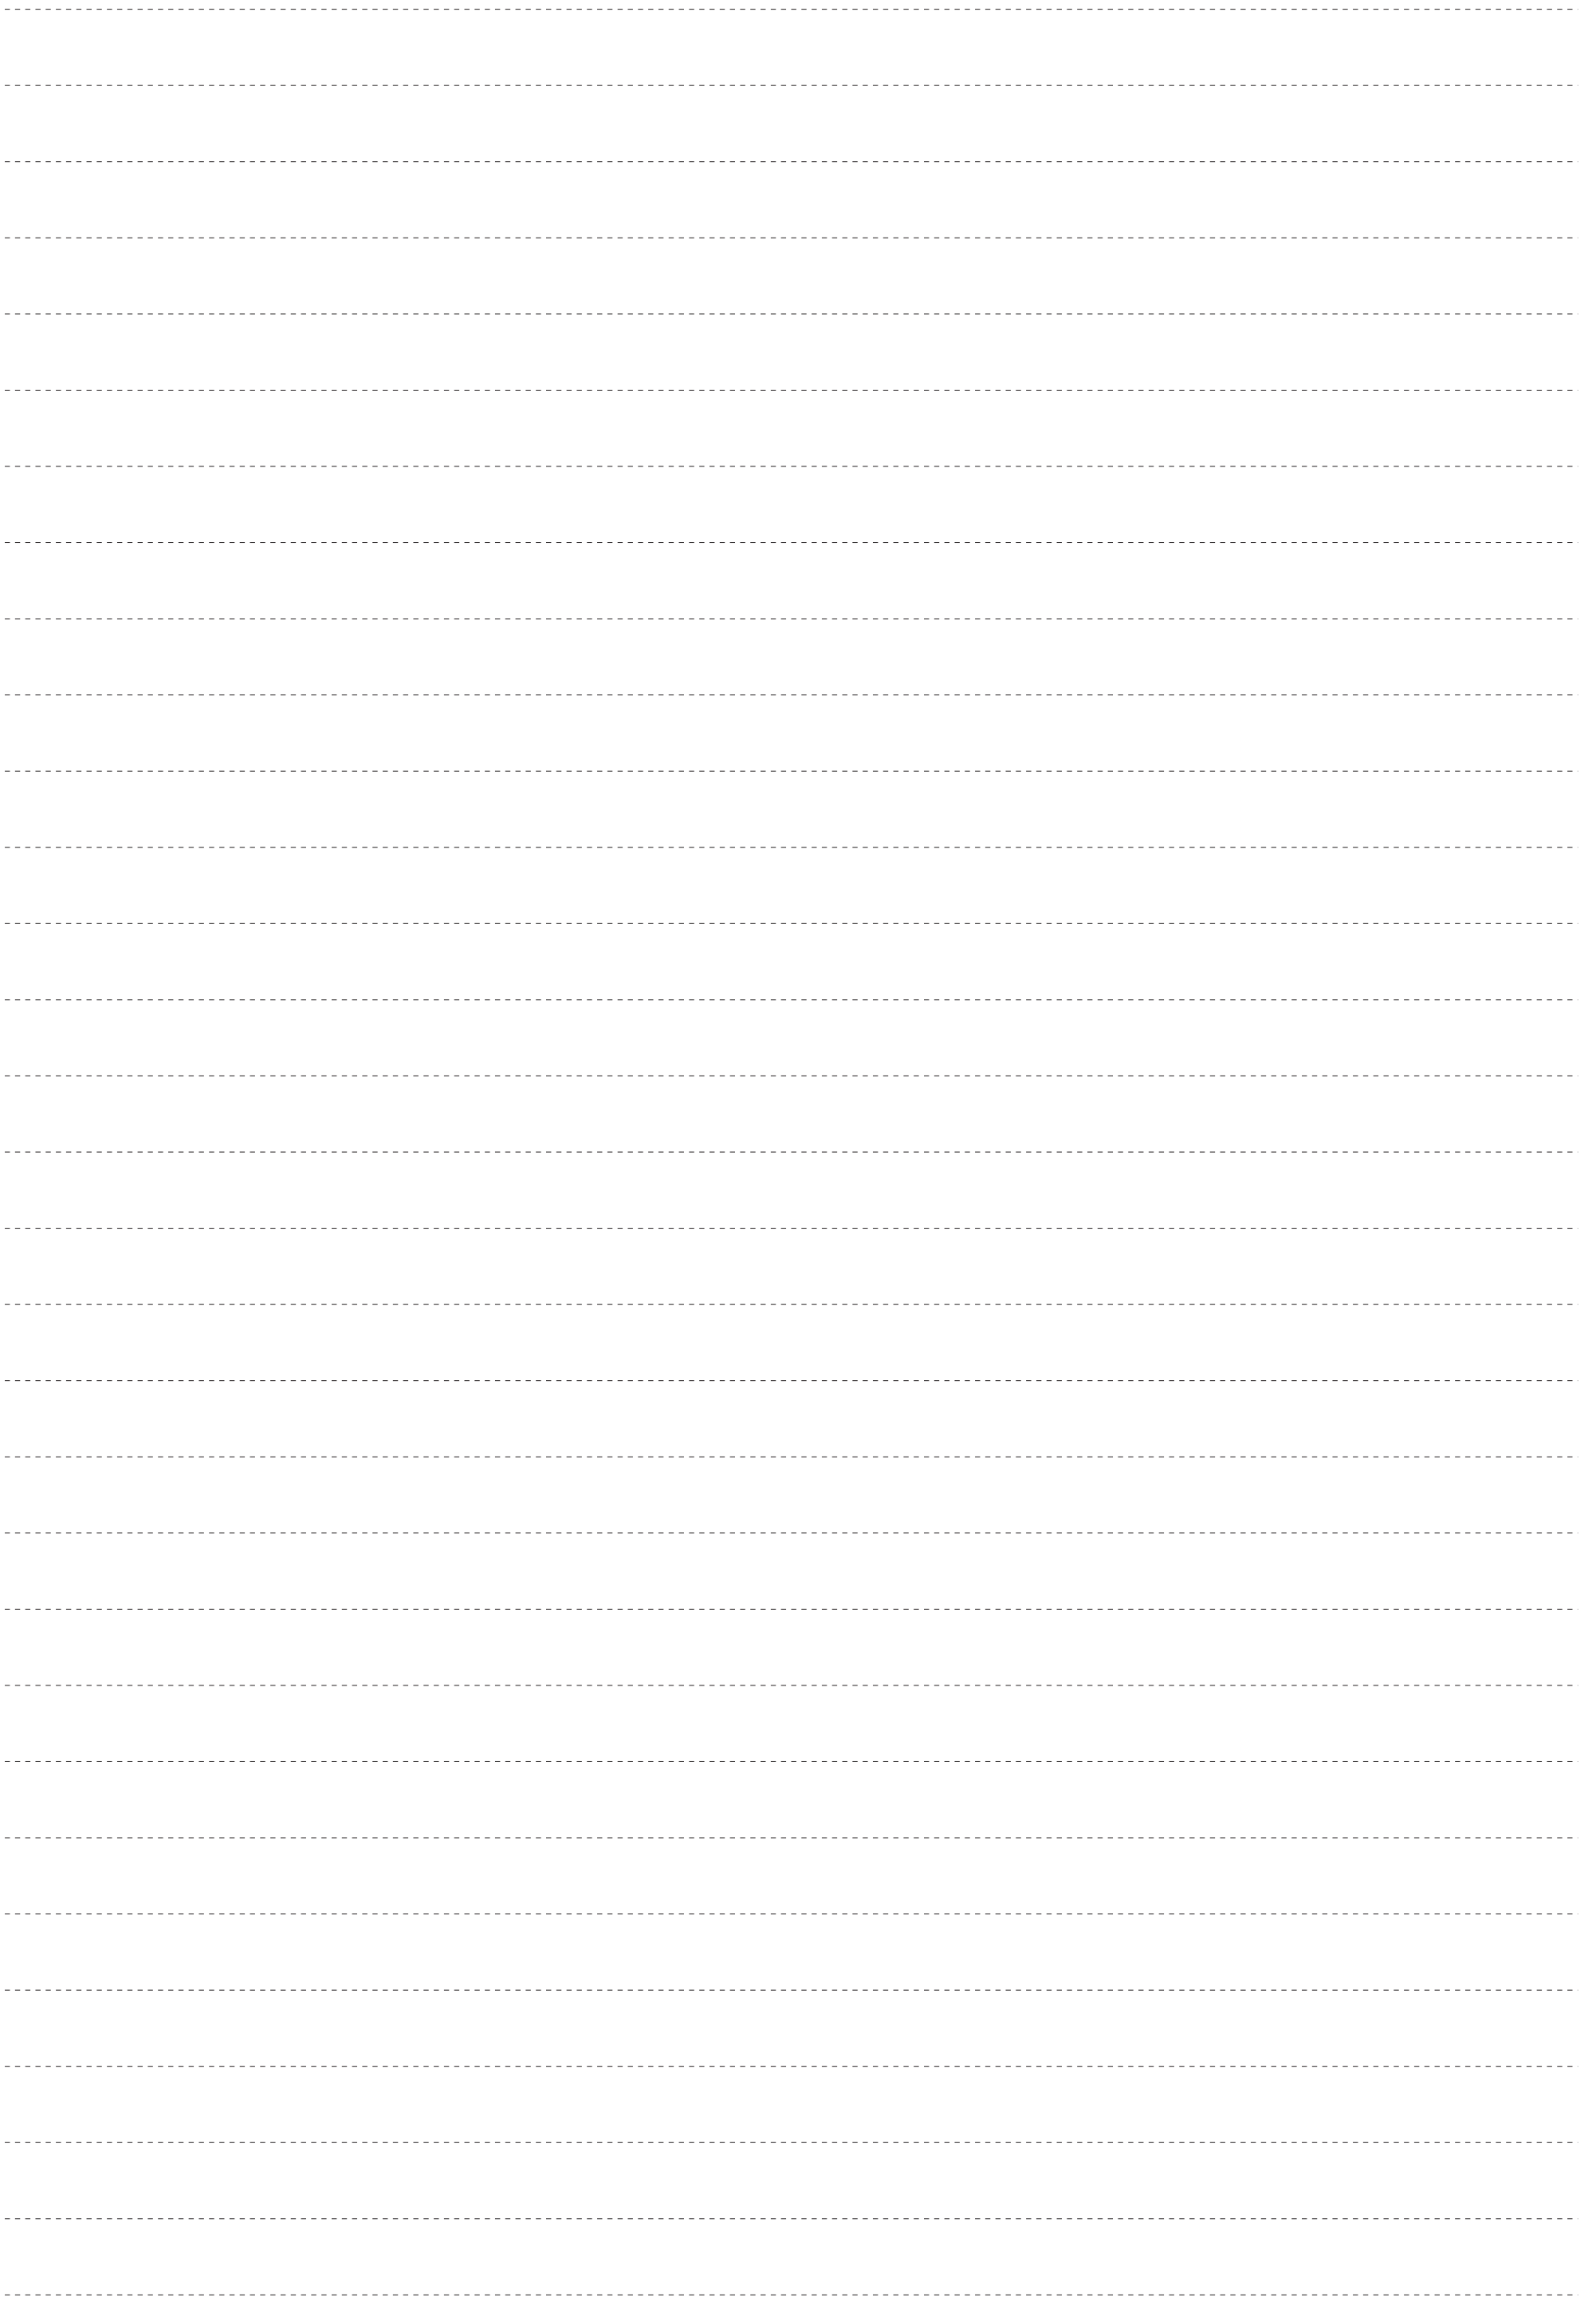

Jersey (160 g/sqm) in 100% polyethylene Trevira Bioactive. High durability and high resistance to pilling with antimicrobial properties. Trevira Bioactive antimicrobial agent is based on silver ions, firmly fixed into the fiber. This treatment is resistant to washing and extremely durable. ANTIUV: UPF20+.

MICRO FRESH WICKING
JS616
110 g/sqm
100% Polyester

**Micro fresh
WICKING**

100% polyester jersey (110 g/sqm) with active control of perspiration and antimicrobial treatment. Very compact, the microstructure on back side reduces the contact points on the skin: this creates a microclimate for quick drying, due to the special hydrophilic treatment that increase comfort. Good UV protection (UPF20+)
